Matthew Reimer

Matthew is an Executive Health Consultant working across Western Canada. In his role he works with health organizations and provincial groups on strategy, business development, quality and risk assessment programs, as well as process development and change management initiatives.

In his role, he is currently part of several provincial boards and health association workgroups, including his role as President of the MB Chapter of the Canadian College of Health Leaders.

His involvement with swimming goes back 10 years when both of his children began swimming with the Steinbach Skimmers. While they swam, Matthew took the opportunity to become involved as an official, and volunteering on deck.

At the same time, he was involved with the local swim club, taking on the role of Club President for several years. During this time, he worked closely with Swim Manitoba to ensure the clubs policy, procedures and operations aligned with the direction from Swim MB, as well as promoting the club and swimming in the province.

While not currently volunteering, he is still closely connected to swimming with his son on the UofM varsity swim team, and his daughter coaching with the Steinbach Skimmers.

Matthew is excited to again be activity involved in the Manitoba swim community, bringing his skills and expertise to the continued growth and success of swimming in the province.

Please welcome Matthew Reimer as one of Swim Manitoba's newest Board Members.
